This is the Diff Ratio Guide created by Diff Lapping and Repairs. It represents our differential and gearbox repair experience since 1968 and is also a partial record of most of the vehicle types we have ever worked on (some information has been omitted for commercial reasons). This is a working document we use everyday as a reference and to which we add information periodically. If you can't find your vehicle, feel free to contact us – we'll help you find what you are looking for.
